## Floater FAQs

### Is the river open to float despite COVID-19?

The status and risk of COVID-19 transmission in our community is ever changing. Unless otherwise advised by local public health officials, equipment rentals and shuttle services are expected to operate for the duration of the 2020 float season. All park visitors and floaters should practice 6 feet physical distancing whenever possible. The Boise River is never closed but is always a float-at-your-own-risk endeavor.

### If I bring my own raft or tube is there a place where I can fill it with air?

To help reduce the spread of COVID-19, the Barber Park air stations will NOT operate during the 2020 season. Feel free to “show up and blow up” as long as you BRING YOUR OWN EQUIPMENT to inflate your vessel.

### Do I have to wear a life vest?

Life vests or personal flotation devices (PFDs) are required to be worn by children age 14 and under. Every vessel must be equipped with a PFD for each person on board. Life vests are recommended to be worn by ALL floaters regardless of age or skill.

### Are there any rapids?

There are three splashy diversion drops during the first half of the float. All floaters should use caution to actively avoid natural or manmade obstacles including bridge piers, rocks, debris and tree limbs.

### How far is it to the take-out?

The take-out is located 6 miles downstream from Barber Park on river left in Ann Morrison Park. The float typically lasts about 2 hours.
